PROJECT

Enerdoss (https://enerdoss.dossware.com)   **20224- present**

- Installation of Sensors and Wiring for Data and Electrical Systems
- Server Management with Home Assistant and Raspberry Pi
- Creating Dashboards and Multi-Platform Hosting

Greenhouse IOT   **2022 - 2024**

- Installation of Sensors and Wiring for Data and Electrical Systems
- Server Management with Home Assistant and Raspberry Pi
- Creating Dashboards and Multi-Platform Hosting

OPEN SOURCE

Dose3 (https://dose3.dossware.com)   **2020 - Present**

- Developing Easy-to-Understand and Maintainable Architecture in Rust and TypeScript
- Building CLI Applications with Node.js and Bun
- Enhancing Performance security and Productivity Tools

DoseUI (https://doseui.dossware.com)   **2022 - Present**

- Designing User-Friendly Interfaces with TailwindCSS
- Enhancing Recharts for Accessibility and Usability
- Developing Lightweight UI for Enhanced Web Performance

EXPERIENCE

Web deverloper freelance   **2020-2024**

ReactJS,NextJS and ExpressJS (NodeJS) experience with high performance website

Solar PV Engineering   **2024-2025**

site survey and design electrical system for solar PV + Make energy report with monitoring data

EDUCATION

Maejo University, Chiang Mai, Thailand.   **2020-2024**

Bachelor of Renewable energy engineering

ADDITIONAL INFORMATION

- **Skill:** Microsoft365,AutoCAD,Solar(PV),Pvsyst,PowerBI
- **Languages:** Thai,English
- **Computer Languages:** Rust,Go,Typescript,C,Python,SQL
- **Library:** React,Svelte,Next,Astro,Nest,Tauri,Vitest,Playwright,Express,Axum,Jax,
  Matplotlib,Polars
- **Database :** Prisma,MongoDB,PostgreSQL
